INSPECTION 17.09.2024

All compliance was met and certs & documents were all in date and in order however, however HFRS stated that smoke alarm was needed to be a safer area in the hallway, small hole in and around the electric box requires to be filled with intumescent filler to prevent smoke ingress though ceiling. Also, there was a watermark on the ceiling in the hallway and the above shower room needs to be checked for leaks or issues that may cause further problems with the building in that area. The under the stair's cupboard needs to be emptied and locked (use as a cleaner cupboard) as there are personal items in there and if door is left open it could cause an obstruction in the potential event of a fire or evacuation

Whilst every effort is made to ensure the accuracy of these details, it should be noted that the measurements are approximate only. Floorplans are for representation purposes only and prepared according to the RICS Code of Measuring Practice by our floorplan provider. Therefore, the layout of doors, windows and rooms are approximate and should be regarded as such by any prospective tenant.

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills will be.
